Victims of mines and explosive remnants of war as a result of Russian aggression
In Ukraine, due to hostilities, more than 30% of arable fields will be unsown.

The total amount of losses caused to Ukrainian agriculture by the full-scale Russian invasion in June 2022 is at least $4.3 billion, according to estimates by the KSE Institute, conducted jointly with the Ministry of Agrarian Policy.

The approximative cost of survey and demining of agriculture lands is near $436 million.
According to information of Ministry of Economic direct losses of Ukraine’s infrastructure due to Russia’s military aggression reached near $100 billion. 6.5 millions are refugees. 8 millions are internally displaced persons.
Since February rapid demining and EOD spot task were conducted:

- in 377 liberated settlements
- on the terrain that covered almost 30 000 sq.km
- more than 150 000 EODs were indicated and destroyed
Steps of the Ukrainian authorities to neutralize the dangers of mines and ERW

Amendments to the Law of Ukraine “Mine Action in Ukraine” adopted by the Verkhovna Rada of Ukraine on September 17, 2020

Approved by the Government of Ukraine operational action plan for mine action on April 15, 2022

Secretariat of MA Authority

Mine Action Center

Humanitarian demining center
Humanitarian demining in Ukraine

Four Mine Action operators, that were certificated in Ukraine, started humanitarian demining tasks in Kyiv and Chernihiv regions.
