UNOSAT Damage Assessment Overview Map

This map illustrates a satellite imagery based building damage assessment in Irpin City, Ukraine.

Based on imagery collected on 31 March 2022, analysts found that 1,060 structures sustained damage visible on the satellite imagery. Out of these, 115 are destroyed, 698 severely damaged, 187 moderately damaged and 60 possibly damaged. This includes 4 education facilities and 3 health facilities. While no complete count of buildings for Irpin is available, an open source dataset which is visibly incomplete indicates at least 3,732 structures in the area.

This analysis is based on structures visibly damaged as of 31 March 2022 as seen in marginally cloudy satellite imagery. This is a preliminary analysis and has not yet been validated in the field. Please send ground feedback to the United Nations Satellite Centre (UNOSAT).

- Legend**
- Destroyed
 - Severe Damage
 - Moderate Damage
 - Possible Damage
 - Impact Crater (Damage to Road)
 - Education Facilities
 - Health Facilities
 - Irpin Boundary

Mine Action Sub-Cluster (MASC) – UNDP Chair

Gov UA: MFA, MOD, STS, MIA, SESU, Police, MRTToT

UN: UNDP, UNMAS, UNICEF, UNOPS, OCHA, OHCHR, UNHCR

IO: OSCE, OSCE PCU, ICRC, GICHD

INGOs: HALO, FSD, DRC, HI*, SC, NPA*, MAG*, PHA

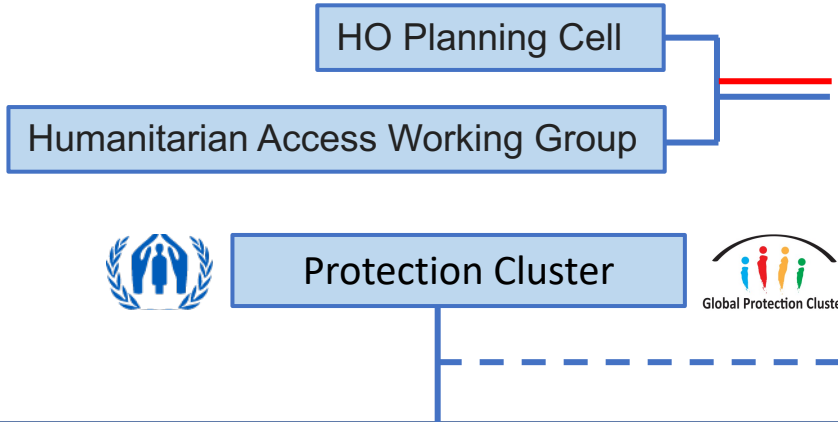

NGOs: UDA, MACF, Airlight

Others: SWEDEC, Donor representatives

Government of Ukraine

UNMAS External

Sector Coordination - Mine Action Sub Cluster (MA AOR) chair

Working Group IM

Working Group* Survey

Working Group EORE

Working Group* Debris

Working Group* VA

GICHD

unicef

* To be confirmed

Regional/decentralized coordination

UNDP and NGO co-chair physical/remote TBC

Capacity Development

- Policy, Strategy & Standards
- Support & training for NMAA, SESU, Police EOD, MRTToT
- Incl. Equipment provision

Programmes

- Needs Assessment
- Explosive Ordnance Risk Education
- Debris management/EO**
- Survey & Information Management
- Mobile EOD teams
- Area Clearance (demining & BAC)
- Victim Assistance - PwD
- Medical Training
- Advocacy (APMBC/CCM)

UNMAS

Convoy Support & Access Assessments

Recent response (select)

- State Emergency Services (SES), Police EOD and the military have cleared 10s of thousands (SESU alone 78,000 items from over 10,000 tasks across 18,000 ha)

This is rapid clearance, mostly surface items – it does not release land to IMAS and will need revisiting. Important for the international community to support

- Equipment support for SES & MOD – OSCE, DRC and NPA
- Significant desk top surveys – GICHD, HALO, DRC, FSD
- Widespread traditional and digital EORE campaigns – 10 partners
- UN conducting remote damage assessments (on-going in 5 cities)
- Debris/EO projects funded – through SESU & local demolition contractor

Still early days – now time to inject funds and expertise into the programme

➤ EORE PROGRAMME IN UKRAINE

Includes offline and online activities, aimed to cover 5M children and 30M adults in 2022:

- Initial **digital campaign** run by UNICEF reached **10M people already**.
- **100 social workers and educators** trained
- In 2022 UNICEF will engage: **6,000 teachers**, over **210,000 children and caregivers** through **face-to-face sessions** in affected regions and those with high concentrations of IDPs.
- **EORE course to be incorporated into school curricula of 2022** by Ministry of Education (MoE).
- UNICEF is coordinating **EORE WG** of over 10 national and international partners delivering EORE

➤ MVA PROGRAMME IN UKRAINE

- **Urgent need to scale up victim monitoring and victim assistance** to ensure that the earlier survivors and victims (66 adult and 106 children) and the new get necessary medical and rehabilitation support

Key priorities – next 6 months

1. Immediate support for national capacities of the SESU & NMAA to address their equipment requirements (UNDP hold lists updated this week)
2. Respond to the request of the Gov to deploy international experts to support mine action in Ukraine (letter from the Deputy Minister, MIA to UNCC)
3. Strengthen national mine action architecture for task ahead – Strategy, Standards, Information & Quality Management
4. EORE (particular focus on returnees & also professionals working in areas of risk)
5. Systematic Non-Technical Survey
6. Ground assessments to validate damage assessments done remotely
7. EOD to support for safe rubble clearance activities
8. Victim Assistance – identification, monitoring and support of survivors and families
9. Advocacy relevant for the use of explosive ordnance

The UN Crisis Coordinator for Ukraine message:

‘Mine Action is a top priority for the Government and UN-leadership in Ukraine. It is a key agenda item at the high-level National Coordination Platform where urgent support is requested’
