Briefing on Explosive Ordnance Contamination in Syria

Mine Action Support Group Meeting

Geneva, Switzerland

24 June 2022

UNMAS technical experts assessing damaged areas in Darayya, Rural Damascus.

By: Habibulhaq Javed, Chief of Mine Action a.i, UNMAS Syria
Overview of the Explosive Ordnance contamination in Syria

From Jan 2015 - Feb 2022, a total of 346,163 explosive ordnance incidents were recorded, which makes an average of 133 incidents per day.
Explosive Ordnance Accidents in Syria

From January 2015 to April 2022: **13,240** explosive ordnance accidents have been recorded and verified, which makes approximately **5** accidents per day.
Who is most at risk?

1 in 2 people living in Syria are exposed to the risk of explosive ordnance, according to the 2022 HNO.

Men and boys represent nearly 85% of total recorded victims.

50% of people exposed to the explosive ordnance threat are children.

Farmers, herders, people on the move, scrap metal collectors and construction workers are mostly impacted by the explosive ordnance contamination.

Explosive ordnance contamination hindering humanitarian aid and service delivery.
Mine Action Sector Response:
Coordination

MASC (UNMAS led and co-led by the Halo Trust) in GZT

MASS (UNMAS led) in Dams

iMMAP MA focal point
Major Achievements

- Establishment of UNMAS in Damascus
- Launch and expansion of EORE activities, using multiple approaches
- Deployment of explosive ordnance technical survey teams
- Start of pilot clearance project in Rural Damascus
- Demolition of explosive ordnance
- Prequalification of Implementing Partners

- launch and expansion of VA activities
- Establishing NTSGs for Syria
- Start of NTS in North was as of March 2022

19 April 2022:
1st explosive ordnance demolitions managed by Humanitarian Mine Action Actor. Darayya, Rural Damascus, Syria.
Little Shepherd

15 June 2022
Darraya, Rural Damascus
In 2021, Explosive Ordnance were the primary cause for child casualties among grave violations documented in Syria!

Prevention is better than cure!

Child’s rights to Education and Health are at risk!

Child survivors grapple with long-lasting psychological trauma!

Severe economic hardship faced by families with survivors of Explosive Ordnance

UNICEF creative approaches for EORE programing, reaching 5M children and caregivers since 2018, with significant expansion plan
Priorities and Funding Needs

Mine Action is a crucial enabler to the delivery of humanitarian aid, services and early recovery to assist people in need, as well as key to safe voluntary return.

Key priorities:

- Sustaining the core functions of UNMAS in Syria
- Start of country wide Non Technical Survey across Syria
- Clearance activities
- Risk Education

Funding Needs:
Mine Action sector in Syria requires **83 million USD** for Mine Action Response across Syria, among which **25 million USD** is UNMAS funding need to sustain its core capacity in Syria, complete the pilot clearance project, launch the non technical survey operation and implement minimum required RE and VA activities.
Thank you for considering support to mine action in Syria.

Mine Action is complex, more complex in the context of Syria, but is a critical Humanitarian need.

However, together we can do it.

H.E Tarja Fernandez, Ambassador of Finland, during her visit to the clearance activities in Darayya, Rural Damascus, Syria.
