Transforming Business Processes through Innovation
Digital Transformation of UN Peacekeeping

The Innovation Workstream identifies challenges across UN Peacekeeping – from both the field and HQ – and leverages data, technology and innovation to address them, enhancing mandate implementation. This work aligns with ongoing field-driven initiatives – accelerating and amplifying their impact.

We Work with Field Personnel and Experts to Empower Solutions That Are:

Field-Centred ✓
Co-created with field colleagues to address operational challenges

Mandate-Focused ✓
Context-responsive digital solutions that enable better delivery of mandates

Tech-Enabled ✓
Technology serves as a solution, not the driver for innovation

How We're Accelerating Peacekeeping Innovation

Promoting Self-Guided Innovation
to Maximize Efficiency with Minimal Reliance on External Expertise

Structured **Innovation Toolkit** with tools and templates enabling every staff member and team to innovate with minimal oversight.

Toolkit

Providing tailored, **on-demand guidance** for applying the Toolkit to real projects.

Supporting Solution Development
to Drive Scalable, Mandate-Focused Outcomes

Innovation **accelerators, incubators and hackathons** driving rapid co-creation of solutions for pressing challenges.

Hands-on support to identify and implement innovative solutions.

Mainstreaming a Culture of Innovation
to Enhance Collaboration, Knowledge Flow & Skills-Building

'Innovation Moments' series bringing together innovation practitioners to share proven approaches, spotlight successfully-deployed solutions, and build skills to self-drive innovation.
