

UNITED NATIONS  
UKRAINE

# Mine Action in Ukraine

*Presentation to Mine Action Support  
Group  
21 June 2023*

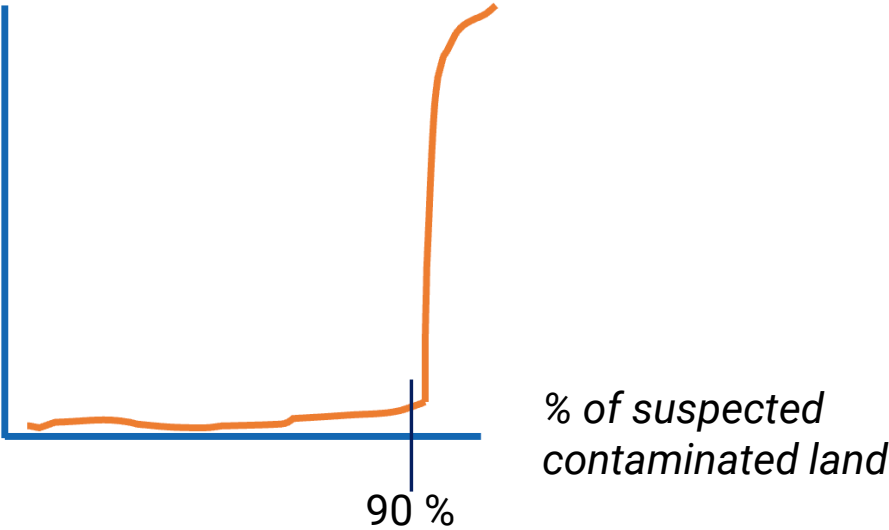

# Key Priorities for UN in Ukraine

## Cohesion, Prioritisation, Resource Management

Density of contamination

- 90% { • How to ensure it is not contaminated
- 10% { • 9% contaminated  
• 1% heavily contaminated

Area to be marked while focusing on other prioritised areas.

Critical area to clear

# Innovative approaches

## Innovative Financing

Energy or agricultural bonds, to support farmers paying for the clearance of their lands.

## Restore and repurpose farmlands

- Mitigate the risk of soil contamination of explosive.
  - *Non-usage of explosive*
  - *Reduction of contamination*
  - *Non-food crops*
- Use the land for other source of revenues: solar panels, wind turbines.

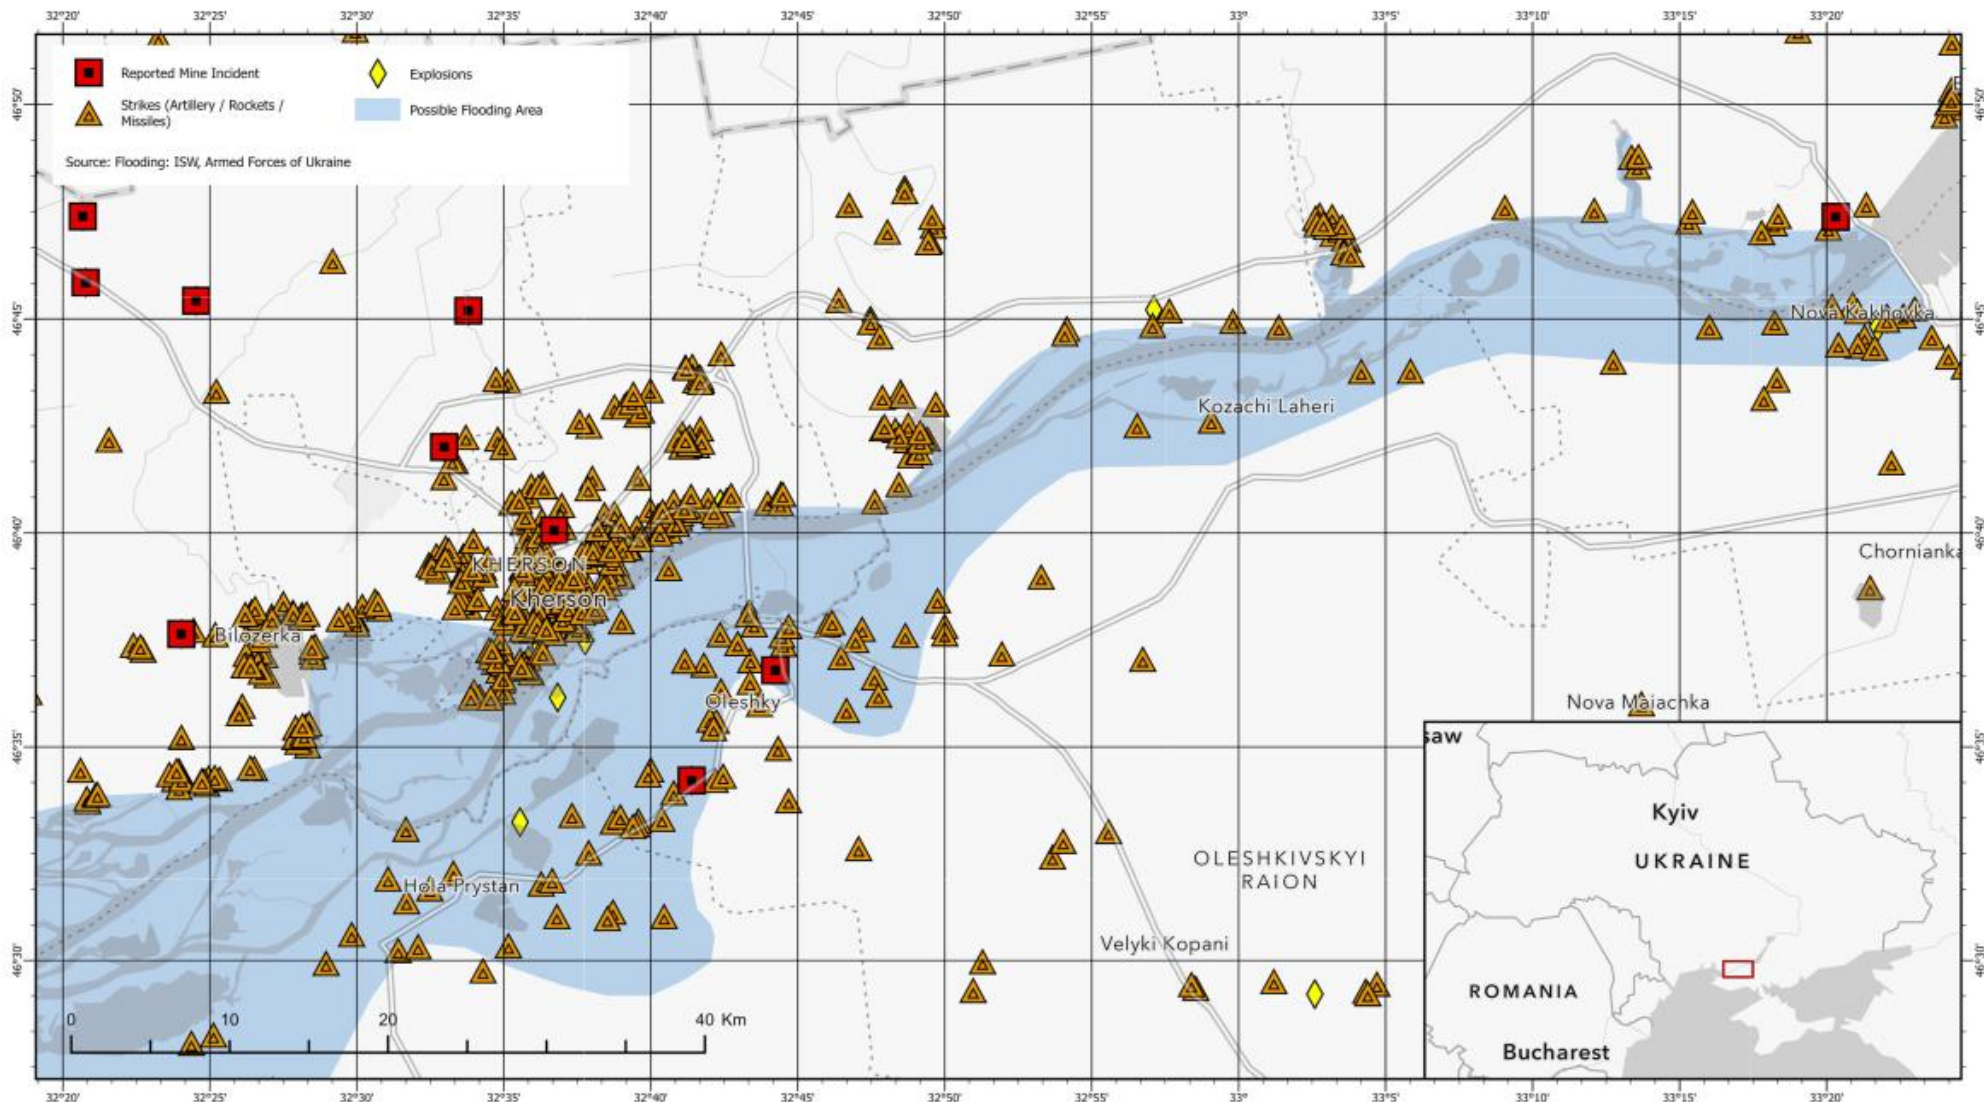

*Instead of WFP provide food from 150k farmers, WFP will be able to buy off food from 150k farmers*

# Support to flooding response in Kherson

**Mapping of the suspected contaminated area by registering strikes and mine incidents since the full-scale invasion in February 2022.**

# Synergies between the Government and the UN

- **Cohesion**
- **Prioritisation**
- **Resource management**

- **Speed up UXO localization**
- **Capacity building**
- **Simplify accreditation process**

- Expand the UN Mine Action team
- Support UN and National coordination
- Support capacity development
- Support innovative approaches

- Create an open market for demining services
- Create a national plan for clearing areas to support rapid recovery
