

International Ammunition Technical Guidelines (IATGs) – stockpile management of conventional ammunition

**For more information on how the UN
SaferGuard Quick Response Mechanism can
assist you**

Contact:

Conventionalarms-unoda@un.org

Next steps - IATGs

- Develop UN SaferGuard staff validation process in partnership with GICHD
- Develop case studies - implementation of IATGs
- Work with relevant commercial industry & private security companies - harmonize standards on safety & security for civilian explosives & ammunition
- Further develop monitoring & evaluation practices on IATG implementation
- Encourage national authorities to nominate focal points on ammunition management
